Principles of the History Curriculum

The United Curriculum for History provides all children, regardless of their background, with:

- **Coherent and chronological substantive knowledge** of the history of Britain and the wider world, selected to build pupils' understanding of three vertical concepts. These vertical concepts provide both a concrete lens through which to study and contextualise history, as well as use small steps to help pupils gain a deep understanding of complex, abstract ideas:
 - **Quest for knowledge**

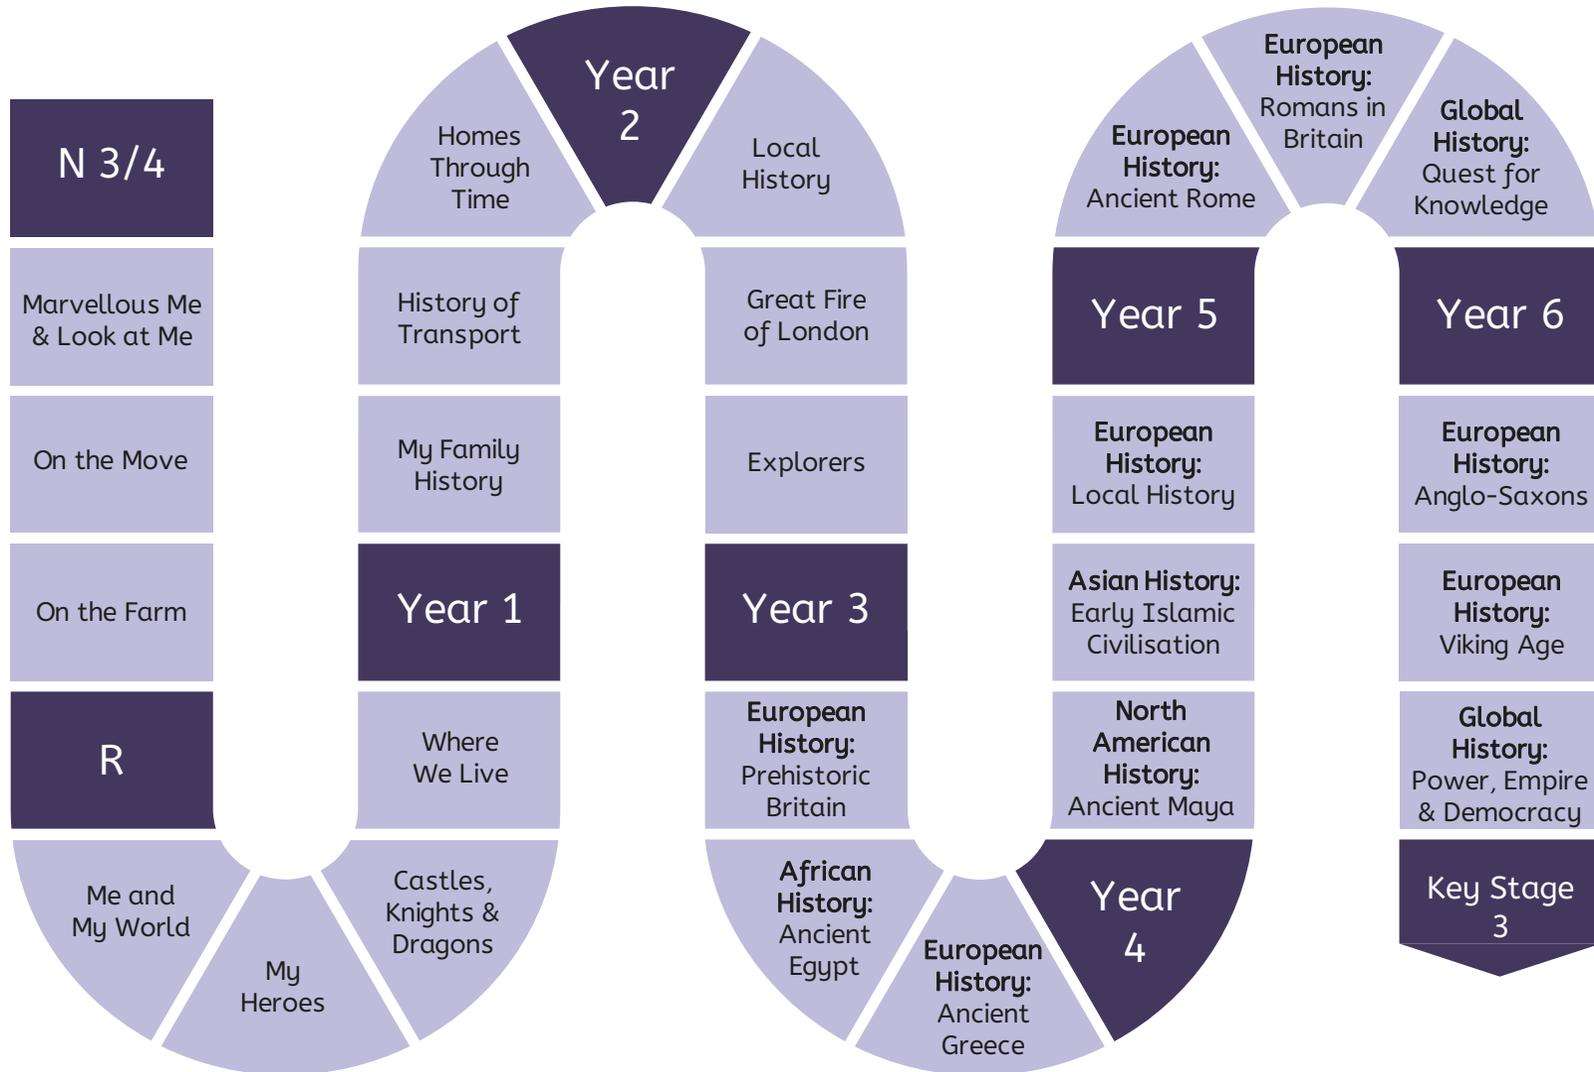

How do people understand the world around them? What is believed; what is known; what scientific and technological developments are made at the time? How is knowledge stored and shared? What shapes people's views about the world?
 - **Power, empire and democracy**

Who holds power, and what does this mean for different people in the civilisations? How is power wielded and legitimised? How are people's rights different in different historical contexts?
 - **Community and family**

What is life like for different people – men, women and children – in different societies? How are these societies structured? How are family and community roles and relationships different in different historical contexts?
- Opportunities for all **pupils to see themselves reflected** in the curriculum, but also to be taken beyond their own experiences. The history curriculum teaches pupils about civilisations from across the world, and always incorporates the experiences – positive and negative – of ethnic minorities in the history of Britain.
- Grounding in **core disciplinary and procedural knowledge**, and the ability to approach challenging, historically-valid questions, giving pupils the ability for pupils to learn how to think, read and write like an historian.
- An **excitement for history**, which inspires a curiosity to learn more about the past.
